POUR FOAM DISPENSING EQUIPMENT

The patented Foampro P3000 polyurethane pour foam dispenser requires no complex and expensive mechanical pumps or proportioners. The uncomplicated design of the P3000 makes it very affordable. The P3000 requires no solvent flush, and can process many different types of foam systems.

The Foampro P3000 was designed with reliability in mind. Since the P3000 has only a minimal number of moving parts, it is very easy to operate as well as easy to maintain.

The P3000 features heated hoses, which allows it to process many different types of foam systems. The P3000 dispenser has an output of up to 15 lbs./minute. An optional timer is available for metered, repeatable shot dispensing.

Polyfoam Products supplies Polypro foam systems in returnable shipping containers, eliminating the problems involved in disposing of empty drums. The cylinders are available in 17 gal., 60 gal., 120 gal., and 350 gal. sizes.
